

Managed Security Service

IoT Security Made Even Easier

You know that you need IoT and smart connected devices visibility and control operating in your airspace, but understand that it would be overwhelming to add so many different devices to your workload? We understand how effort intense and time consuming it can be. That is why, we offer to do it for you.

THE HARMONY IoT MANAGED SERVICE GIVES YOU THE PERSONALIZED IoT SECURITY EXPERTISE YOU NEED TO QUICKLY AND EASILY PROTECT YOUR AIRSPACE, END-TO-END.

HARMONY IoT MANAGED SERVICE DETAILS

HARMONY IoT Managed Service allows you to add IoT security, without adding to your team's workload. You can now safely connect and embrace IoT.

DEPLOY HARMONY IoT DEFENSE

Placing HARMONY IoT Smart Protectors, to monitor your airspace, with zero involvement from your IT.

Setting policies for your specific environment that adhere to your corporate, security and compliance requirements.

Automatically enforcing policies to prevent violations and protect against IoT-born attacks.

MANAGE

Monitoring your airspace to understand all the IoT and wireless activity in your environment.

Analyzing risk so you understand the severity of any threats in your airspace.

Suggesting policy adjustments, as needed, to enable ongoing, automated protection against new and emerging threats.

RESPOND TO ATTACKS

Providing real-time notifications, when there is an issue or attack that needs your attention.

Recommending actions, based on best practices, to ensure the swift resolution of incidents and optimal outcomes.

Providing insights, that make it easy for your team to understand exactly what's going on and what it means for your business.

HARMONY IoT MANAGED SERVICE BENEFITS

FILLS YOUR IoT CYBERSECURITY GAP

Adds expert guidance and valuable IoT and wireless device knowledge to your organization, so you can ensure you have the best practice security in place.

ACCELERATES YOUR TIME-TO-VALUE

Makes deploying and managing the HARMONY IoT defense seamless, so you can rest assured your airspace is safe and your ongoing business operations are protected.

OPTIMIZES YOUR CYBER SECURITY PERFORMANCE

Accelerates the identification and response to IoT and wireless-born threats in your airspace to keep your corporate, security and compliance policies enforced.

Harmony IoT provides the most robust solution for airspace threat prevention.
